Gaza • +970 597631724 • jokermohmd7@gmail.com • linkedin.com/in/mohamed-sukker-3190ab161

Full-Stack Developer

Full-Stack Developer skilled in building modern and scalable web applications using Laravel, React.js, and Next.js. Experienced in developing full systems for HR, finance, education, and real-estate platforms, with a strong focus on clean architecture, performance, and automation. Known for delivering efficient solutions, designing reusable components, integrating APIs, and improving workflow speed across organizations.

WORK EXPERIENCE

Gym Tech - Gym Management System • Gaza • 05/2026 - 07/2026

Multi-tenant SaaS platform for managing fitness centers and gyms. Allows gym owners to handle branches, members, subscriptions, attendance, payments, and staff through a centralized system with advanced reporting and Telegram integration.

Full-Stack Developer (Solo / Lead Developer) • Freelancer

Built a comprehensive multi-tenant SaaS gym management system using Laravel, serving multiple fitness centers with member management, subscriptions, attendance tracking, and advanced reporting features.

- **Launched and maintained the live platform:** <https://gyms.sokar.dev/>
- Developed a full-featured multi-tenant SaaS platform for gym management using Laravel 11, supporting multiple gyms and branches under one system.
- Implemented core modules including Member Management, Subscription Plans, Attendance Tracking, Payments, Coaches & Staff Management.
- Built a robust SaaS billing system with subscription plans, activation/deactivation, and admin impersonation feature for better support.
- Designed advanced permission system using Spatie Laravel Permission with role-based access control across all modules.
- Created comprehensive reporting dashboard with 8+ report types (Payments, Attendance, Members, Subscriptions, etc.) with Excel & PDF export and Telegram integration.
- Developed RESTful API using Laravel Sanctum to support potential mobile applications and third-party integrations.
- Built responsive admin interface using Blade, Tailwind CSS, Alpine.js, and Chart.js for analytics and data visualization.

Segilly - SaaS Financial System • Gaza • 03/2026 - 07/2026

Segilly is a modern multi-tenant SaaS financial and accounting platform designed for small businesses and merchants in the Arab market. It helps merchants manage transactions, debts, inventory, invoicing, and subscriptions from one centralized system.

Full-Stack Developer (Solo / Lead Developer) • Freelancer

Developed a complete multi-tenant SaaS accounting and financial management system using Laravel from scratch. Built core modules for transactions, debts, inventory, invoicing, subscriptions, and reporting with Telegram integration and mobile API support.

- **Launched and maintained the live platform:** <https://segilly.sokar.dev/>
- Designed and developed a full-featured multi-tenant SaaS platform using Laravel 13, PHP 8.4, and MySQL.
- Implemented key financial modules including Customers, Transactions, Invoices, Debts (Receivable/Payable), and Inventory Management with automatic tracking.
- Built a robust subscription & billing system with package management and active subscription protection.
- Integrated advanced features such as Excel/PDF reporting (Maatwebsite & mPDF), Telegram Bot notifications, and REST API for mobile app synchronization.
- Developed responsive admin dashboard using Blade, Alpine.js, Tailwind CSS, and Chart.js for analytics and data visualization.

Senabil Foundation – Unified Management System • Gaza, Palestine • 11/2025 - 05/2026

Full-Stack Developer • Full-time

Full-Stack Developer responsible for designing, developing, and maintaining a comprehensive multi-module enterprise management system using Laravel and Blade. The system supports HR, Finance, Programs (Education, Health, Relief), Logistics, Inventory, Monitoring, and Warehouse operations. Focused on building scalable modular architecture, responsive dashboards, secure authentication, role-based access control, and automated workflows to enhance operational efficiency and decision-making.

- **Launched and maintained the live platform:** <https://auth.sanabelpanel.com/>
- Built a scalable multi-module management system using Laravel & Blade, serving HR, Finance, Programs, Monitoring, and Warehouse operations for the foundation.
- Designed a clean, modular backend architecture in Laravel with optimized controllers, models, and reusable components, effectively separating HR, Finance, Education, Health, Relief, Logistics, and Inventory systems.
- Developed responsive, user-friendly dashboards and interfaces using Blade, TailwindCSS, and reusable components, significantly improving workflow efficiency, data accessibility, and user experience across all departments.
- Implemented secure authentication, role-based access control (RBAC), and automated workflows, reducing manual administrative tasks and enabling accurate real-time reporting and operational decision-making.

Senabil Foundation for Youth & Development • Gaza, Palestine • 06/2024 - 05/2026

Full-Stack Developer • Full-time

Full-Stack Developer tasked with building and launching the official Senabil Foundation website using Next.js integrated with a custom Laravel-Blade CMS. Delivered a modern, SEO-optimized, bilingual (Arabic/English) frontend with high performance. Managed full deployment, DNS configuration, SSL setup, and hosting on Vercel and Hostinger to ensure stability and scalability.

- **Launched and maintained the live platform:** <https://www.senabil-pal.org/>
- Built and launched the official Senabil Foundation website using Next.js integrated with a custom Laravel-Blade CMS.
- Delivered a modern, SEO-optimized, high-performance bilingual frontend (Arabic/English) with excellent user experience.
- Managed complete deployment pipeline including DNS, SSL, and hosting setup on Vercel + Hostinger, ensuring high stability and scalability.

Bikam – Real Estate Valuation Platform • Remote • 10/2025 - 12/2025

Frontend Developer (Next.js)

Frontend Developer (Next.js) responsible for developing the complete frontend architecture of a Real Estate Valuation Platform. Built a fast, modern, and scalable user interface with interactive features including Google Maps integration for property valuation, secure authentication using Auth.js, and advanced state management to deliver an excellent user experience.

- **Launched and maintained the live platform: <https://bikam.sa/>**
- Developed the complete frontend architecture of the Bikam Real Estate Valuation Platform using Next.js, delivering a fast, modern, and scalable interface.
- Implemented secure user authentication and session management using Auth.js with Google Provider, including role handling and protected routes.
- Integrated Google Maps API for interactive property valuation with dynamic location selection and real-time price estimation.
- Built reusable components and advanced state management using Zustand, TailwindCSS, and shadcn/ui, accelerating development and ensuring consistent, responsive user experience.
